Programming Languages: C#, Python, Java, Javascript, HTML/CSS, C, MIPS

Skills: Agile Scrum, Github, React.js, Numpy, Panda, Matplotlib, Unity

WORK EXPERIENCE

Vail Academy and High School

Tucson, AZ

Site Tech Coordinator Shadow

09/2021-11/2021

- Gained hands-on experience in IT troubleshooting and event preparation, including diagnosing hardware, software, and network issues, as well as configuring and setting up technical equipment for events.
- Learned about IT support workflows, including ticketing systems, troubleshooting protocols, and user support best practices.
- Collaborated with faculty and staff to ensure smooth day-to-day and event technical operations, enhancing communication and problem-solving skills.

Lins Grand Buffet

Tucson, AZ

Food Station Attendant

07/2022-Present

- Collaborated with a team to keep all areas stocked and presentable while coordinating with specialists to ensure efficient buffet operations.
- Managed and solved customer requests by communicating with other teams, improving problem-solving and communication skills in a fast-paced environment

PROJECTS

Crime in Tucson Analysis | <https://github.com/LuckieMusngi/Crime-in-Tucson-Analysis>

- Spearheaded an analysis of crime in Tucson, identifying patterns and predicting crime levels.
- Aggregated and cleaned official Tucson crime data using Panda and Numpy.
- Analyzed data using machine learning techniques.
- Visualized data and analysis using Matplotlib.

Python, Jupyter Notebook, Numpy, Panda, Matplotlib, Scikit-learn

WeatherApp | <https://github.com/LuckieMusngi/Weather>

- Used react.js to create a working weather application with an interactive and responsive UI.
- Used the OpenWeatherMap API to retrieve the weather of user-input cities in real time.

Javascript, HTML/CSS, React.js

Battleships JavaFX | <https://github.com/CSC335/BattleShipGameProject>

- Worked with a group to create our twist on the classic Battleship game, complete with an interactive and animated GUI.
- Used Agile Scrum to structure our team and manage our workload.
- Organized the overall structure of the project and ensured that every part fit together and made sense.
- Solved various implementation problems, assisted others as necessary, and implemented game logic.

Java, JavaFX, Agile Scrum
